George A. Hashim, Ph.D.
Associate Research Director
The Council for Tobacco Research
900 Third Avenue
New York, NY 10022

Dear Dr. Hashim:

The Satellite Meeting of the *American Society for Biochemistry and Molecular Biology (ASBMB)* and *The International Society for the Study of Xenobiotics (ISSX)* entitled "The Cytochromes P450: Structure, Function, Regulation and Genetics" was held on Saturday, May 21 and Sunday, May 22 in the Grand Hyatt Hotel in Washington, D.C. In addition to a strong scientific session, a Dinner celebrating the career of Ronald W. Estabrook was held. There were 275 registrants at the meeting and over 320 persons attending the Dinner. The organizers, Bettie Sue Masters, Michael R. Waterman, and I received many compliments regarding the quality of the science and the personal response to Ron Estabrook at the Meeting and Dinner.

In completing the meeting, I wanted to share with you the Program and a souvenir button, as a way of expressing our thanks to you and your organization in supporting this Satellite Meeting. The *ASBMB* Council was so pleased with the success of this meeting, that they have initiated a call for including 2-4 such satellite meetings with all of their future meetings. So, the event was not only a strong scientific event, but may have set the pace for the two Societies.

Again, our thanks to you in supporting this excellent meeting.

Sincerely yours,

Russell A. Prough
